INTERESTS

PROJECTS

FOLDLINGS

iOS APP — in development

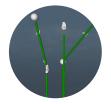

A tool for creating and simulating 90-degree pop-up books with arbitrary shapes. iOS development in Swift using SceneKit. Created with Tim Tregubov and Marissa Allen. See: www.foldlings.com

WORD BLASTOFF

iOS WORD GAME — June 2014

A physics-based word game, now available on the App Store. Pixel-perfect design and development with Objective C, using SpriteKit. Created with Michelle Khare. See: www.wordblastoff.com

ARBOR BIOLOGY

UNITY APP — April 2014

3d visualization software for annotated phylogentic trees. I created mockups, built a parser for the tree format, and developed game components in C#. Created with DALI Lab student members.

DEKAAZ

WEB APP DESIGN — May 2014

A social network surrounding a new form of poetry. Dekaaz is a form created by Rachel Bagby, similar to the Haiku. I made wireframs & high resolution mockups. Created with DALI Lab student members.
